#### WHAT DOES DISARMAMENT MEAN

The Russians broke into the disarmament conversation at Geneva with the spectacular proposal that the nations should disarm. reports that the United Maxim Litvinov, soviet spokesman, not only has more crime called for a complete abolition of any other country but the land, sea and air forces, razing of system of crime statistics, fortresses, scrapping of warships, only making public what evelimination of conscription, deswho seriously studied truction of all weapons, military already knew. The report supplies and means of chemical supplies and means of chemical warfare.

Of course, the Russians created a sensation. That is what they meant to do, and it was easy. It was necessary only to talk disgrib. ament at an international gathering convened to talk disarmament. The queer part of the affair is that they did not mean to be funny.

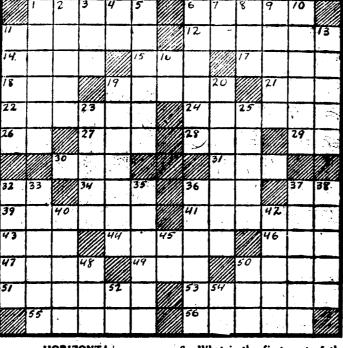

But it was about time that a major/power called the disarmament bluff of the other big powers. Not a nation in the world has not engaged in wordy "disarmament" conferences since the war, to no practical result. Armies and navice are larger than before the World war; there is more military propaganda in every nation; more

talk of the "next war." The way to disarm is to disarm. just as the way to war is to arm. The Russians have called the bluff of the "disarmament" hypocrites.
